18" TCI Rock Reamer
 Fitted with 12" stabiliser
 Fitted with New 8 3/4" Random TCI bit segments
 Fixed towing eye
 Backout Cutters

Sizes and connection made to order.

Horizontal Hole Openers - HDD Rock Reamers
 Horizontal Hole Openers, also know as HDD Reamers, are used to enlarge the pilot hole in Horizontal Directional Drilling (HDD).
 We offer a range of sizes made to order, with either new or used TCI cone segments. Different nozzle options are available, to ensure fluids are directed correctly. Wear protection is offered to extend the workable life of the body.
